

Wooden round rods (not octagons !) (daz_2001)
Ø 50mm, the upper part is narrowed down to Ø app.
38mm

10 x 185cm (8 corners + 2 pergola)

- the last upper 5cms are narrowed down.

1 x 330cm (central rod)

- the central rod has at the bottom one metal foot (see the photo down on the left side). To make the transport easier, the rod is split in two halves with central metal connectors (30cm metal tube, see the photo below). The last upper 10cms are narrowed down.
